Full stack web developer leveraging digital marketing background to build a more intuitive and unique user experience on the web. Earned certificate in full stack development from the University of Pennsylvania, and certificate in digital marketing from BrainStation, with recently developed skills in JavaScript, HTML5, CSS, Bootstrap, and responsive web design. Innovative problem solver and quick learner who is passionate about developing and improving web applications. I applied React JS in a recent project. I volunteered on a team of three to develop an e-commerce website that helps local business owners sell and advertise their products. Strengths in Creativity, teamwork, and building projects from ideation to execution.
